

GERARD JOSEP RAMON CATASUS

Game Designer • Systems & Gameplay Specialist

El Vendrell, Spain • 625926780 • gerhoquei8@gmail.com

PROFESSIONAL PROFILE

Passionate game designer with proven expertise in systems design, level design, and gameplay mechanics. Strong foundation in player experience, iterative design, and cross-discipline collaboration within fast-paced development environments. Experienced in designing engaging gameplay loops, progression systems, and intuitive player interactions across multiple platforms. Seeking to bring creative vision and technical game design knowledge to innovative game projects.

CORE STRENGTHS

- **Comprehensive Game Design:** Full-cycle game design expertise spanning systems design, level design, mechanics iteration, and gameplay balancing. Proven ability to own creative vision from concept through shipping.
- **Player-Centric Design:** Systematic approach to playtesting, iteration, and player feedback integration. Focus on creating intuitive, engaging experiences that keep players invested and coming back.
- **Technical Collaboration:** Deep understanding of production pipelines and technical constraints from hands-on work with developers in Unity and other engines. Ability to communicate design intent clearly and design implementation-aware solutions.
- **Creative Leadership:** Led design direction for cross-discipline teams, defining feature roadmaps, gameplay systems, and maintaining creative vision across development cycles.

EMPLOYMENT HISTORY

Lead Game Designer & Game Director | *GameRoom3 Studio*

Jan 2025 – Present

- Owned complete creative vision for game design, leading concept, lore, level architecture, and gameplay systems for 6-person development team
- Designed and balanced core gameplay systems, progression mechanics, and feature sets aligned with project vision and player engagement goals
- Managed iterative design cycles, conducting playtesting and refining systems based on gameplay feedback
- Coordinated cross-discipline workflows between art, design, and programming to maintain creative vision and deliver features on schedule

Game Designer | *Gamium · Barcelona*

Jan 2024 – Oct 2024

- Designed and prototyped core gameplay features, systems, and mechanics for live product
- Conducted systematic playtesting and gameplay iteration, documenting build states and gathering player behavior data to inform design decisions
- Designed progression systems, player feedback loops, and interactive mechanics focused on player engagement and experience quality
- Collaborated with engineers and product managers in Agile (Scrum/Kanban) environment to iterate rapidly and deliver features on schedule

Freelance Game Designer & Developer Collaborator | *Independent*

Oct 2024 – Dec 2024

- Collaborated on game projects implementing gameplay systems, mechanics, and interactive features

- Developed deep understanding of designer-developer pipeline and technical implementation constraints
- Strengthened ability to translate design intent into production-ready implementations and communicate with engineering teams

Cybersecurity Workshop Educator | CodeLearn

Jul 2023 – Aug 2023

- Developed and delivered educational workshops, honing communication and curriculum design skills applicable to gameplay clarity and player onboarding

EDUCATION

Bachelor's Degree in Video Game Design and Development (Sep 2020 – Jun 2024)*CITM – Centre de la Imatge i la Tecnologia Multimèdia*

Scientific-Technological High School Diploma (Sep 2018 – Jun 2020)*Institut Baix Penedès, El Vendrell*

DESIGN EXPERTISE

Systems & Mechanics: Gameplay systems design • Progression mechanics • Game balance & tuning • Feature design & prototyping • Player feedback loops • Interactive mechanics • Core loop design

Player Experience: Level design • UX for games • Player onboarding • Difficulty balancing • Playtesting & iteration • Player engagement design • Accessibility in game design

Creative Direction: Lore & narrative design • World-building • Art direction collaboration • Aesthetic vision • Design documentation

Game Engines & Tools: Unity (primary) • Unreal Engine 5 • Game development pipeline • Level editors • Prototyping tools

Production Methodology: Agile (Scrum/Kanban) • Iterative design cycles • Documentation practices • Cross-discipline collaboration • Build management • Release cycles

Art & Visualization: Blender • Maya • 3D Max • Substance Painter • Visual asset pipeline • Environment visualization

LANGUAGES

Catalan — Native speaker

Spanish — Native speaker

English — Fluent (professional proficiency)
